

# The A-Class Saloon

Mercedes-Benz

## The saloon. Now also as an A-Class.

It's the way we used to draw cars when we were children: divided up into engine compartment, interior and luggage compartment according to the so-called 3-box design. And the A-Class Saloon gets us dreaming along these lines again. The profile is so dynamic yet timelessly elegant. The A-Class Saloon with MBUX (Mercedes-Benz User Experience) in a sporty 3-box design.

More spacious feeling.

The image shows the front interior of a Mercedes-Benz A-Class Saloon. The focus is on the dashboard and the MBUX infotainment system. The infotainment screen displays a music player interface with a song titled 'Tokyo' by 'Ella E.' and a 'Comfort' mode selection. Below the screen are four circular air vents with a three-spoke design. The dashboard is finished with a light-colored, textured material. The background is a blurred view of a parking garage with a red and white striped barrier.

## Knows the way home. And your habits.

MBUX, the new Mercedes-Benz User Experience, introduces artificial intelligence into the A-Class Saloon. It learns more every day and, most importantly of all, gets to know its driver more and more. It can remember your favourite songs and the route to work. It then automatically adjusts the right radio station or shows you a faster way if your usual route is congested. All by itself and as a matter of course, if that is what you want.

A silver Mercedes-Benz A-Class car is shown from the rear left side, driving on a city street. The background features a modern glass building on the left, a row of green trees, and a historic red brick building on the right. The scene is captured with a motion blur effect, suggesting the car is moving quickly. The sky is clear and blue.

## Energising comfort and exemplary safety.

Be it at rush hour, during a long drive at night or on an unfamiliar route, your A-Class noticeably takes the strain off you, particularly in stressful situations. It's all down to a concept that makes every journey in a Mercedes-Benz a safer and exceptional experience: Mercedes-Benz Intelligent Drive. Because the time you spend behind the wheel is your time. Time for relaxation. Time to replenish your energy. So that, above all else, you reach your destination even more safely and are also more relaxed when you get there.

The rear of the A-Class Saloon.  
The dawn of a new design era.

The puristic styling of the A-Class finds elegant fulfilment in the Saloon: it features a distinctive rear end, in which two-piece tail lamps add to the impression of breadth. The load compartment is not just nice, but also very ample. As an option you can also even open it without using your hands, with the HANDS-FREE ACCESS function.

A-Class Saloon.

With Mercedes 

## Safety and assistance.

Thanks to radar sensors and a 3D stereo camera, the A-Class Saloon monitors its surroundings and is able to maintain the correct distance to the vehicle in front at up to speeds of 210 km/h as well as brake automatically in an emergency situation.

## MULTIBEAM LED.

MULTIBEAM LED headlamps adapt to the visibility conditions and other road users within a split second. For instance the partial main beam does not affect identified road users, so the road surface is always ideally illuminated without dazzling oncoming vehicles.

## Mercedes-Benz User Experience.

MBUX (Mercedes-Benz User Experience) does not drive for you, but it makes driving as pleasant as possible for you. Thanks to artificial intelligence the system can learn to adapt more and more to drivers over time. With the intelligent LINGUATRONIC voice control system you can almost speak as naturally as you would to a close friend.

## Smartphone Integration.

In the A-Class Saloon you can charge your smartphone by placing it on the centre console. And the best thing: thanks to near-field communication (NFC), your smartphone immediately connects to the A-Class Saloon without lots of intermediate steps or having to enter a code.

Sending text messages or scrolling through contacts is also no problem at all. In the A-Class Saloon you can use your smartphone without having to pick it up. Use USB or NFC to connect it to the vehicle. Then conveniently control almost all apps and functions via the multimedia system display using the Touch Control buttons on the steering wheel.

## “Wrap-around” design.

The interior of the A-Class Saloon literally hugs its occupants. Smooth transitions between instrument panel, centre console and door trims create the pleasant wrap-around design. This is unique in this vehicle category, just like the selection of trim elements and the ambient lighting that showcases everything to best effect.

## Widescreen display.

Here one glance says more than a thousand words. The interior of the A-Class Saloon impresses with its extraordinary look to give you completely new perspectives. Not just on one, but on two high-resolution displays, 17.78 centimetres (7 inches) in size as standard. Optionally extra large at 26 centimetres (10.25 inches). In any case, the screens seem to be floating within the interior. They are also super easy to operate using the Touch Control buttons on the steering wheel, the optional touchpad or the touchscreen.

## Head-up display.

You will automatically have your eyes on the road with the head-up display in the A-Class Saloon, because it directly projects all relevant information, such as speed, speed limits or navigation information into your field of vision. Virtually and in full colour. Adapt the content of the display field and save your preferences using the memory function.

## Seating comfort and spaciousness.

If you take a look around in the A-Class Saloon, you may be surprised to find just how spacious it is. In particular the rear will also provide sufficient legroom for taller persons. The A-Class features sports seats with adjustable head restraints. Multicontour seats are available in conjunction with comfort seats. Seat climate control and additional upholstery variants are optionally available. For travelling comfort at a luxury level.

## Standard equipment and appointments.

You already get a great deal of A-Class without selecting a single item on the options list. As a result the vehicle shows its generous side in its standard specification. The brand's hallmark high standard of safety is reflected in the Active Brake Assist and Active Lane Keeping Assist. The air conditioning system provides for your desired climate

## The Style design and equipment line.

With the Style design and equipment line your car stands out from the standard equipment. A youthfully cool look inside and out. This includes additional features such as the 16-inch light-alloy wheels plus upholsteries and topstitching in trendy colours which are exclusive to the line.

## The Progressive design and equipment line.

The Progressive design and equipment line substantially enhances your car. Added value you can see and feel. From every perspective the excitement and high-quality technology associated with a compact premium saloon are intensified.

## The AMG Line.

With the AMG Line you are making a clear statement on performance both inside and out. Above all, the AMG bodystyling with special front and rear aprons lends the car a resemblance to AMG models. In addition, the technical features with lowered, sportily tuned suspension and the Direct-Steer system serve to intensify the driving experience.

## DYNAMIC SELECT.

Just drive as you want to. At the press of a button DYNAMIC SELECT offers different drive programs with setting options for the engine, transmission, chassis and steering, for instance. In “Sport” mode the vehicle is more dynamic and in the basic “Comfort” drive program its setup is very balanced. “ECO”, on the other hand, places the emphasis on maximum efficiency, saving both fuel and money.

The “ECO” drive program gives you particularly comprehensive support when you want to avoid CO<sub>2</sub> and pollutants. The seat heating and air conditioning work with reduced output in this setting and thus also save valuable energy. In “Individual” you choose all the respective parameters yourself. This means that you can select a sporty setting for the drive system and at the same time have a comfortable setting for the chassis.

## Comfort suspension.

Enjoy a high level of comfort on long motorway stretches while tackling tight curves with sporty flair. The balanced comfort suspension provides an impressive mix of responsive suspension reserves with excellent driving stability. This makes your driving safe while at the same time providing a great deal of driving pleasure.

# Instant performance.

Every Mercedes-AMG is a masterpiece in its own right, with an unmistakable character. What unites our performance vehicles and sports cars is their irrepressible sporting spirit. Their passion for top performance. It is generated at the point where engineering skill meets a very special attitude: the spirit of AMG. We believe that you have to keep on challenging limits in order to achieve new goals. We accept nothing as a given. Because limits are imposed by people, and it's also people who can overcome them. It's this attitude that enables us to achieve outstanding performance for the race track – and for the road.

Welcome to the world of AMG.
